People are either a Rio person or a São Paulo person. Going purely on your eyes and your senses, it's impossible to imagine why someone wouldn't be a Rio person. The place is like the Angelina Jolie of metropolises. Brazilians tell me that Rio is great to visit, but bad to live in.

This natural wonder is the only Dark Sky Preserve in northern Ontario and some of the province's inkiest skies. Plus, Manitoulin is magical, a far off the beaten path island in Lake Huron that feels lost in time with a slow-lane pace and authentic Aboriginal culture.
